DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 1/10/02. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6,9,10,13-18,21,22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Showghi et al 6,473,739.

Showghi et al clearly teach a method for receiving order data from a variety of wireless devices of a customer, checking inventory, authenticating the customer and payment means, and processing the order.

Claim R jections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6,7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Showghi et al '739 in view of Treyz et al 6,587,835. Treyz et al specifically teach the use of a Bluetooth enabled wireless device (col. 13, lines 28-32) or a radio communications device (col. 12, lines 61-62). It would have been considered an obvious matter of design choice to use any of the multitude of portable wireless communications means as taught by Treyz et al in the method of Showghi et al.

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Showghi et al '739 in view of Henrick 6,507,727. Henrick teaches the use of a WAP communications device (col. 1, line 44-45). It would have been considered an obvious matter of design choice to use the WAP type portable wireless communications means as taught by Henrick in the method of Showghi et al.

7. Claims 11,12,19,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Showghi et al 6,473,739. The computer program code product limitations are inherently taught by the Showghi et al reference. It would have been obvious to one of ordinary skill in the art that the method taught by Showghi would be enabled by computer program code.
